PRESS RELEASE

September 29, 2026

Turkish Banking Sector Main Indicators *
(August 2026)

According to provisional data submitted by banks to our Agency, the total assets of the Turkish banking sector reached TRY 55.743.429 million as of August 2026, marking an increase of TRY 8.796.631 million compared to the end of 2025.

As of the same date, loans, which constitute the largest component of assets, stood at TRY 28.156.437 million, while securities holdings amounted to TRY 7.957.048 million. From year-end 2025:

- Total assets grew by 18,7%,
- Total loans increased by 21,7%
- The securities portfolio expanded by 13,5%.

The non-performing loan (NPL) ratio was realized at 2,92 %.

Deposits, representing the primary funding source of the banking sector, increased by 18,1% compared to the previous year-end, reaching TRY 32.157.064 million.

During the same period, the total shareholders' equity of the banking sector increased by 14,8 % relative to year-end 2025, reaching TRY 4.771.159 million. As of August 2026, the sector's net profit amounted to TRY 676.307 million, while the capital adequacy standard ratio stood at 16.60%.

Respectfully announced to the public

(*) Prepared based on data dated September 28, 2026. Banks' reports, submitted on an unconsolidated basis are used.
